1 Introduction

In the summer of 1398, I became familiar with the Html markup language and when I started learning it, I realized that I am interested in the field of site design. That is why I started working in the field of site design. I gained experience, then got acquainted with Roshdana courses, and because I was interested in working with a young team and gaining experience, I worked as a site designer in Rosdana, who was selected as a project manager after completing my internship. And I worked, after 7 months, I got acquainted with the field of digital marketing and SEO, and now I am gaining experience in Farahamham Technology and Communication Company and in the top SEO team as an SEO expert.

3 table

cell1	cell2	cell3
cell4	cell5	cell6

4 math

$$x^n + y^n = z^n$$

5 Coding

```cpp
//c++
#include <iostream>
using namespace std;

int main()
{
    int i, n, factorial = 1;

    cout << "Enter a positive integer: ";
    cin >> n;

    for (i = 1; i <= n; ++i) {
        factorial *= i;    // factorial = factorial * i;
    }

    cout<< "Factorial of "<<n<<" = "<<factorial;
    return 0;
}
```
